

The Electrical Engineering department and Cal Poly Robotics Club present:

# Let's build an Underwater Robot!

All majors welcome  
Freshmen and Sophomores preferred  
3 hour commitment per week  
Learn to solder, program, and laser cut  
Learn about underwater technology  
and robotics  
Only 25 dollars!

During winter quarter you can learn all about underwater robotics by building a miniature Underwater Remote Operated Vehicle (ROV) in a team of 4-5 students. No tests, no grades, just fun building an underwater robot. Meets three hours every week, time and day of week to be determined based on student availability.

If interested in participating this winter quarter please email:
